

Science communicator

Internship at Scienseed

Are you looking for work experience in science communication? Apply for an internship at Scienseed's Communication Department.

We continuously consider applications from motivated students who are knowledgeable and passionate about science communication. If you are considering a career in scicomm and want to try your hand at producing multi-format communications for clients from different scientific disciplines, this opportunity is for you!

Company description

Scienseed SL is a **science communication agency** based in Madrid. Our work is to design and develop communication strategies that are both creative and scientifically accurate. To this end, we specialise in a wide range of formats, including video, animation, web, graphic design, press, publications, social media strategies, advertising campaigns, communication plan consulting, public engagement activities, apps and videogames. We work with national and international clients, and we are responsible for the communication of large research consortia funded by the European Commission. In addition, we have two complementary lines of work by teaching training courses in science communication and carrying out research to assess and increase the impact of our campaigns.

For more in-depth information, you can visit our website (www.scienseed.com) and our social network accounts.

Requirements:

- English and Spanish, both fluent.
- You must be enrolled in a higher education institution, preferably studying towards a title in science communication or similar discipline.

Other considerations:

- Our offices are in Madrid, but remote work is possible.
- Some previous experience in science communication will be valued.

- We offer 3-month internships, which could be expanded up to 6 months.

How to apply

Please send us an e-mail to careers.scicomm@scienseed.com with a cover letter and an updated version of your CV as attachments. In the e-mail subject, please write “[scicomm internship] Your name”.
