

Scicomm Strategist

Open position at Scienseed

Over the next few weeks, we will be hiring a new full-time science communicator to join our Communication Department. We are searching for talented, experienced, and motivated communicators who are willing to work in a dynamic and vibrant environment.

Company description

We are a multidisciplinary agency based in Madrid that brings together experts in different fields of science, arts and technology for the translation of complex knowledge into multiformat, strategic and international communication actions. Our work consists of designing and developing communication strategies that are both creative and scientifically accurate. To this end, we specialise in a wide range of formats, including video, animation, web, graphic design, press, publications, social media strategies, advertising campaigns, communication plan consulting, public engagement activities, apps and videogames.

At present, we work on national as well as on international projects, in both public and private sectors. In addition, we have two complementary lines of work by teaching training courses in science communication and carrying out research to assess and increase the impact of our work.

For more in-depth information, you can visit our website (www.scienseed.com) and our social network accounts.

Professional profile

At Scienseed we are responsible for the design and execution of the communication strategy of multiple European projects and technology companies. This position aims to find a person who will help us coordinate these tasks in our company. We would like to find people with experience in strategy design and impact analysis of communication plans. Experience in exploitation and technology transfer although not required, will be highly appreciated.

We are a small company and the aforementioned tasks will be performed with others that are usually included in the execution of those plans: copywriting for social media, websites, writing scripts for animation or short-movies, advertising campaigns... Thus, the expertise in some of these formats will be valued too.

The position requires high levels of creativity, as well as the ability to work in teams with short-, medium- and long-term goals. We are searching for professionals with a problem-solving ability and the willingness to adapt to the workings of a small but growing company.

Requirements

- Degree or equivalent in journalism, communication or sciences*.
- At least 3 years of full-time experience in science or corporate communications*.
- Experience in managing multichannel communication of different science-related projects*
- English and Spanish, both fluent.
- Although telecommuting is feasible in our company the position requires, at least in the medium-term, office presence in Madrid.

** In case you do not fulfil one of these requirements but you are highly motivated to work in Scienseed, you may still apply and explain in your cover letter why you think you would be suitable for the position.*

Salary

Competitive salary based on experience.

How to apply

The deadline for applications is 24/07/2020. Interviews may begin before the application period ends. The estimated contract start date is August-September 2020.

Please send us an e-mail to careers.scicomm@scienseed.com with a cover letter and an updated version of your CV. In your subject, please specify "[Scicomm strategist] + Your name".
