

Project Manager

Scienseed is a renowned **science communication agency** based in Madrid. Our work involves **strategic consultancy** and the **development of communication plans** for clients in sectors related to science and technology. We specialize in a **wide range of online and offline formats**, including multimedia, web, graphic design, written formats, campaigns, activities, among others. We have a **multidisciplinary team** of researchers, graphic designers, journalists, and web developers. At present, we work Europe-wide with clients requiring proficient communication of **scientific & technical contents**. Specifically, we work **with universities, research institutes & biotech companies**, among others, and we also participate in **large international research projects** leading the communication actions.

Your profile

We are searching for a talented, experienced, and motivated person to act as a **project manager** and **lead point of contact with clients** and to allow **smooth leadership and coordination** of science communication projects. This position involves the following main functions:

- **Project management** of science communication projects at all stages,
- Consultancy role on **science communication strategies** before the client,
- Design of **work plans**, including budgeting,
- Preparation of **project proposals and presentations**,
- Production of **briefings**, meetings with clients to clarify specific **requirements** of each project,
- **Follow up and coordinate** with the creative team,
- Perform other related duties as assigned.

Scienseed is a **small and dynamic company** where there are multiple opportunities to take on new roles. Thus, you will have the chance to **participate in other processes** in the company depending on your profile.

Requirements:

- Work experience in **project management** or **consumer-oriented positions**.
- Specific knowledge and/or experience in **communication** or **marketing**.
- High proficiency in **English and Spanish**, both written and oral.
- Strong working knowledge of the **Microsoft package**, especially Microsoft Excel.
- Some previous experience in the **scientific sector** will be valued.

Skills:

- Strong verbal and written **communication skills**.
- Organised, **proactive** and analytical.
- Independent **problem-solving** attitude.
- Excellent **listening, negotiation and presentation** abilities.
- Agility, **flexibility** and capability to adapt and work quickly.
- Ability to juggle multiple projects at a time, work in teams, to meet deadlines as well as **short, medium- and long-term goals**.
